EXECUTIVE SUMMARY

A better and private tomorrow

SOLUTION

ResilientOne Freedom allows the division of complex systems into its constituent parts enabling third parties and users to select and control ownership of their personal data, independently of the social media platforms that they are using.

Resilient One

1 Deconstructed Network

Allow users to easily write, deploy, select and support software, integrating and combining components that better fits their needs.

2 Privacy and Security

Users using our distributed access federation can safely and securely perform their daily tasks while protecting their data.

3 Data Custodian

We don't control or own our clients information and data. Allowing the user to grant us permission if used in their behalf.

“

In life, unlike chess, the game continues after checkmate.

”

Asimov

1 COMMUNICATIONS AUTONOMY

Users cycle across an array of communication mechanism every day, between devices, between each other, **Freedom** allow to always stay current and up to date with their network, friends and family by syncing and interconnecting independently.

2 ACCOUNT INDEPENDENCE

Autonomy and logic are embedded to your devices and accounts to allow independence of action, logging and resiliency. Multi-platform software allows for fully orchestrated hardware and software landscapes.

3 DISTRIBUTED FULLY AUTONOMOUS A.I.

The platform generates models for each individual agent and distributes its logic to allow better and faster learning, data acquisition and execution across your ecosystem, maximizing engagement and user retention.

4 HIGH P2P BANDWIDTH SMART STORAGE

Use of our proven peer-to-peer smart network storage easily transfers and analyzes high-traffic data between assets, and reacts quicker and smarter where and when you need it.

APPLICATIONS

Industrial IoT

ResilientOne's Freedom extends new technologies to remote locations previously constrained by connectivity challenges, decision making and slow response to environmental and artificial events.

Clean and Efficient Energy

ResilientOne's Freedom provides connectivity to solar panels, wind farms and oil rigs around the world, delivering insights via ResilientOne's network everywhere your business operates.

Global Development

ResilientOne's Freedom helps organizations deploy devices in regions with poor communications infrastructure and connects people through localized hubs in locations without cellular or WiFi coverage.

“

I am not overstating when I say that ResilientOne changed our company.

”

Scott Getchel, Product Manager, Govzilla

APPLICATIONS

Shipping and Maritime

ResilientOne's Freedom enables you to implement reliable, affordable solutions for critical connectivity. With ResilientOne, you won't miss key insights on status, location, health, weather, safety and performance that ensure the success of your critical operations.

Space Exploration

ResilientOne's Freedom provides a unified and coherent platform framework to easily coordinate and synchronize small aircraft and instruments in space, transfer data and handle natural and artificial events.

Social Networking

With the ResilientOne, data stewardship and federated security is possible, allowing people to take back full control of their information and privacy, safeguarding data sharing between actors and handling security incidents before spreading.

“

Epyphite came to our rescue with an elegant and quick to implement solution.

”

Fernando Cassina, Managing Director, Iafis System do Brasil

Freedom

*None of us, including me,
ever do great things. But
we can all do small
things, with great love,
and together we can do
something wonderful.*

- Mother Theresa

Epyphite is a Singapore-based data security agency that specializes in helping businesses to build and grow their data and information needs. With presence in more than six countries across three continents, **Epyphite** is one of the fastest growing companies in the ASEAN region.

Our Goal

To provide 'just in time' intelligence, data and quality software solutions to the aerospace sector, driving innovation, disruption and growth, pushing boundaries of deep technologies and integrating them for a common and social goal.
